DETAILED ACTION

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Mitchell Harris (Reg. No. 42,638) on 8 November 2006.

List of Claims

1. (Currently Amended) A method for managing energy use in a multi-threaded processing system, said method comprising:

first measuring ~~the~~ a per-thread usage of a device by each thread in a first set of multiple threads concurrently executing within said multi-threaded processing system, said measured usage comprising an indicator for each of said multiple threads, wherein said device is a device coupled to and external to a processor executing said first set of multiple threads;

storing said measured per-thread usage for each of said first set of threads;

determining a next set of threads scheduled for execution;

retrieving a previously-stored per-thread measured usage of said device corresponding to said next set of threads;

predicting a usage of said device by said next set of threads in conformity with said retrieved usage; and

sending a power management command to said device in conformity with a result of said predicting, whereby a power management state of said device is set in conformity with said previously-stored measured usage corresponding to said next set of threads.
